# TS ME

High Performance Professional  
Electrostatic Sprayer Backpack

The TS ME electrostatic sprayer is a portable equipment autonomous with batteries that allows to disinfect all types of spaces in a professional, efficient and profitable way.

Very functional backpack that allows the user to perform services without the need for an electrical connection. Its great manoeuvrability makes the TS ME ideal for carrying out work in different spaces of all types of installations, whatever their size. It is fast, effective and offers great coverage.

## CHARACTERISTICS

- High impact polymer structure shell
- Lithium battery lasts 3 hours of autonomy
- Stainless steel connectors
- Support belt
- 1.2 m hose
- Lightweight for daily use
- Very practical and comfortable to transport
- Uniform coverage
- Silent
- Digital battery reader
- Separate starter connector

Dimensions **43.2 x 37.1 x 18.5 cm**

Net weight **9,9Kg**

Weight with packaging **11.4 Kg**

Gun batteries **2 un. of 9V**

Flow rate **Up to 90/110 ml/min**

Drop size **40microns**

Tank capacity **2.5 Lts**

MADE IN  
SPAIN

Complies  
with CE

MAXIMUM  
QUALITY

Incorporates the  
latest technology

TECHNICAL SERVICE  
24/48 HOURS

We will be in touch  
quickly and efficiently

Electrostatic Technology

## THE ALL-ENCOMPASSING ELECTROSTATIC TECHNOLOGY OF THE TS ME

The disinfectant solution for spaces and utensils for all sectors and industries

The TS ME works through electrostatic spraying, avant-garde technology patented by TecnoStatic. The "all-encompassing" nature of this machine provides a 360° disinfection, enabling savings in disinfectant solution, time and labour.

The electrostatic spraying works by applying an electric charge to the disinfectant liquid. When these liquids are sprayed, the droplets are attracted to the surfaces which have the opposite electric charge, adhering to these surfaces exactly and uniformly.

The TS ME provides greater cleanliness than any conventional system out there, as it reaches every last nook and cranny, coating the surface of any object present. It does not require an electrical connection, which makes it very versatile in places with difficult access or without electrical connection. With its lithium battery an autonomy of up to 3 hours is achieved.

**TOTAL COVERAGE**

Spraying is uniform and precise, covering even the least accessible of areas

**PREVENTION OF CROSS-CONTAMINATION**

Avoid bacteria, germs or viruses spreading from one surface to another

**NOTABLE SAVINGS MADE**

Significantly quicker application times

**ASEPSIS GUARANTEED**

You do not need to move the surfaces or objects

**QUICKER DRYING TIME**

Spraying leaves a super-fine layer that dries really quickly

**ENVIRONMENTALLY FRIENDLY**

Uses only the minimum chemical products required
